CS3095 DBMS Lab
Exercise No: 1
Date of Announcement: 13/07/2018
Due Date: 25/07/2018
Marks: 5

Topic: Familiarization of HTML and PHP

1)   Develop a web page to accept the following data items from a user to create the biodata/CV of a student. The data items should be stored in a file in proper format. Use HTML and PHP for the implementation.

Data items to be collected are:
      i. Name
      ii. Roll number
      iii. Date of birth(Check for validity)
      iv. Address
      v. Mobile number
      vi. E-mail id
      vii. Semester & SGPAs (can go upto 8 semesters maximum)
      viii. CGPA
      ix. Hobbies
      x. Hosteller or Day scholar
      xi. References

2)   Implement a search facility to display the details of a student after reading the roll number, using HTML and PHP.
